I am writing you this letter in reference to our topic of conversation regarding the Bell Landfill Site in Terry Township, Bradford County, Pa. During our conversation, I explained to you that I have visited and interviewed Christopher Bell, Herbert Bell's brother. He was most helpful in giving me information about the day to day management and operations of the site during the time period that he worked there, 1978 through 1980. He advised me to get in contact with you for help and information regarding the stops and pick-ups at small businesses that were made by you for the Bell Landfill. (Please make a special note next to any businesses that used small drums for their industrial waste pick ups.)

Chris, I need from you a list of all the names of the businesses and their locations that you were ever sent to for waste pick-ups. I need this information in order to coincide it with information already received from Christopher Bell and other witnesses interviewed. I have been told by Christopher Bell that other small businesses did have their waste picked up and brought to the site by you.

I have provided you with a stamped envelope addressed to me. This information is much needed in excelling this matter to a speedier conclusion. If there are any questions you would like answered, please call on the toll free phone number provided (1-800-628-0472) and leave a message, (attention John Rajkowski) and I will return your call promptly.

Thanks again to you and all the other people of Bradford County that have helped me along the way with this important matter.

Sincerely,

Civil Investigator
